TO BOARD OF HEALTH SURVEYORS, &c.
WILLIAMSON'S SECTIONAL LINES (assigned to WATERLOW and SONS), divided into nths, 10ths, 12ths, 16ths, 20ths, and 32ths of an inch, in figures of 24 inches by 18, and 18 inches by 9. Tracing papers, mounted drawing papers, and every article for the use of Surveyors, Architects, Engineers, &c.—WATERLOW and SONS, Stationers, Lithographers, Printers, &c., 65 to 68, and Carpenters'-hall, London-wall.

TO ARCHITECTS, BUILDERS, &c.
ATTENTION IS REQUESTED TO THE DIRECT ACTION BALL TAPS, Invented and patented by H. THOMPSON, C.E.
In these Taps the old fashioned lever is done away with, whose leaning action, whilst the water was being admitted, soon wore out the cone, and rendered the cock unsound.
The Direct Action Ball Taps cannot stop up or down, thereby either flooding or leaving premises with no water; a fault which all similar contrivances possess in a greater or less degree.
They will fill a reservoir in less time than any other tap of similar dimensions, on account of the waterway remaining fully open until the water in the cistern is within one inch of the required level, when they shut off without the possibility of leakage.
The perpendicular principle, with compensating valve inside, renders this action unerring and perfect under any pressure whatever.
Specimens can be seen in action at the office; and all necessary information, with drawings, forwarded by application to MARGUETT THOMPSON and CO., Engineers, 23, Parliament-street, Westminster.

BRITISH MUTUAL LIFE OFFICE.—The Public are invited to examine for themselves the old and tried system, guaranteed by the Assurances which policies are granted by this Office. Apply to CHARLES JAMES THICKE, Secretary, 11, New Bridge-street, Blackfriars.
